Adding Context

- The Context-Template

The Context-Template

```
# Optimised for: qwen2.5:32b via ollama
# System: macOS Tahoe 26.3.1
# Ollama: 0.17.7
# Command:
# OLLAMA_MODEL=qwen2.5:32b summarize-meeting.sh --game packs_and_prejudice
# Last Change: 2026-03-09

##
## This meta-information document is used by the summarize-meeting.sh script to
## contextualizes names, roles, groupnames, organizations and terms
## and to counter their inconsistent
## spelling in transcripts created with whisper.
##

## About the game
---
game: The Name of the Game
slug: the_name_of_the_game
language: en
system:
setting: |
  Place, Era etc.
  Describe the main storyline and important plotpoints

# Out-of character chat information
#
## Add names, nick names and spelling variants found in the transcript
## to contextualize out-of-character chat
## that isn't part of the narrative.
