

# Preventing Interference

In Legcord, open the Discord Voice & Video settings:

- Setting all Sounds to off
- Setting the Soundboard Volume to off

Discord's notification sounds and soundboard audio would otherwise be picked up by the virtual microphone and fed into the transcription, giving you lower-quality results. This is especially relevant when working with a smaller model like `tiny`, which has less capacity to filter out irrelevant audio.

# Soundboard

## Soundboard Volume

Control how loud sounds are for you personally. For more info, [click here](#).

## Entrance Sounds

Choose a Soundboard sound to automatically play whenever you join a voice channel. Right-click on a voice channel to join without playing your entrance sound. [Learn More](#).
